Dominus Nusantara

Company
Profile

Professional Coconut Shell
Activated Carbon Manufacturer

Presented by: PT Carvion Dominus Nusantara

About Our Company

PT Carvion Dominus Nusantara is an Indonesia-based manufacturer of coconut shell activated carbon, serving industrial and commercial needs through reliable production focus, professional communication, and long-term business cooperation.

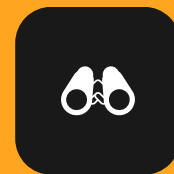

- Focused on coconut shell activated carbon manufacturing.
- Supplying product forms for industrial applications.
- Supporting inquiries with clear product information.
- Committed to reliable and long-term cooperation.

Vision for the Future

We aim to build trusted business relationships by supplying coconut shell activated carbon with consistency, professionalism, and reliable support.

Vision

To become a trusted Indonesian partner in coconut shell activated carbon supply.

Mission

To provide reliable activated carbon products through focused manufacturing and clear communication.

Commitment

Maintaining responsible handling, practical support, and dependable cooperation.

Approach

Combining product focus, professional service, and long-term partnership.

Core Capabilities

We support industrial buyers with coconut shell activated carbon supply, product information, application understanding, and professional business handling.

Product Supply

Coconut shell activated carbon in selected product forms.

Quality Support

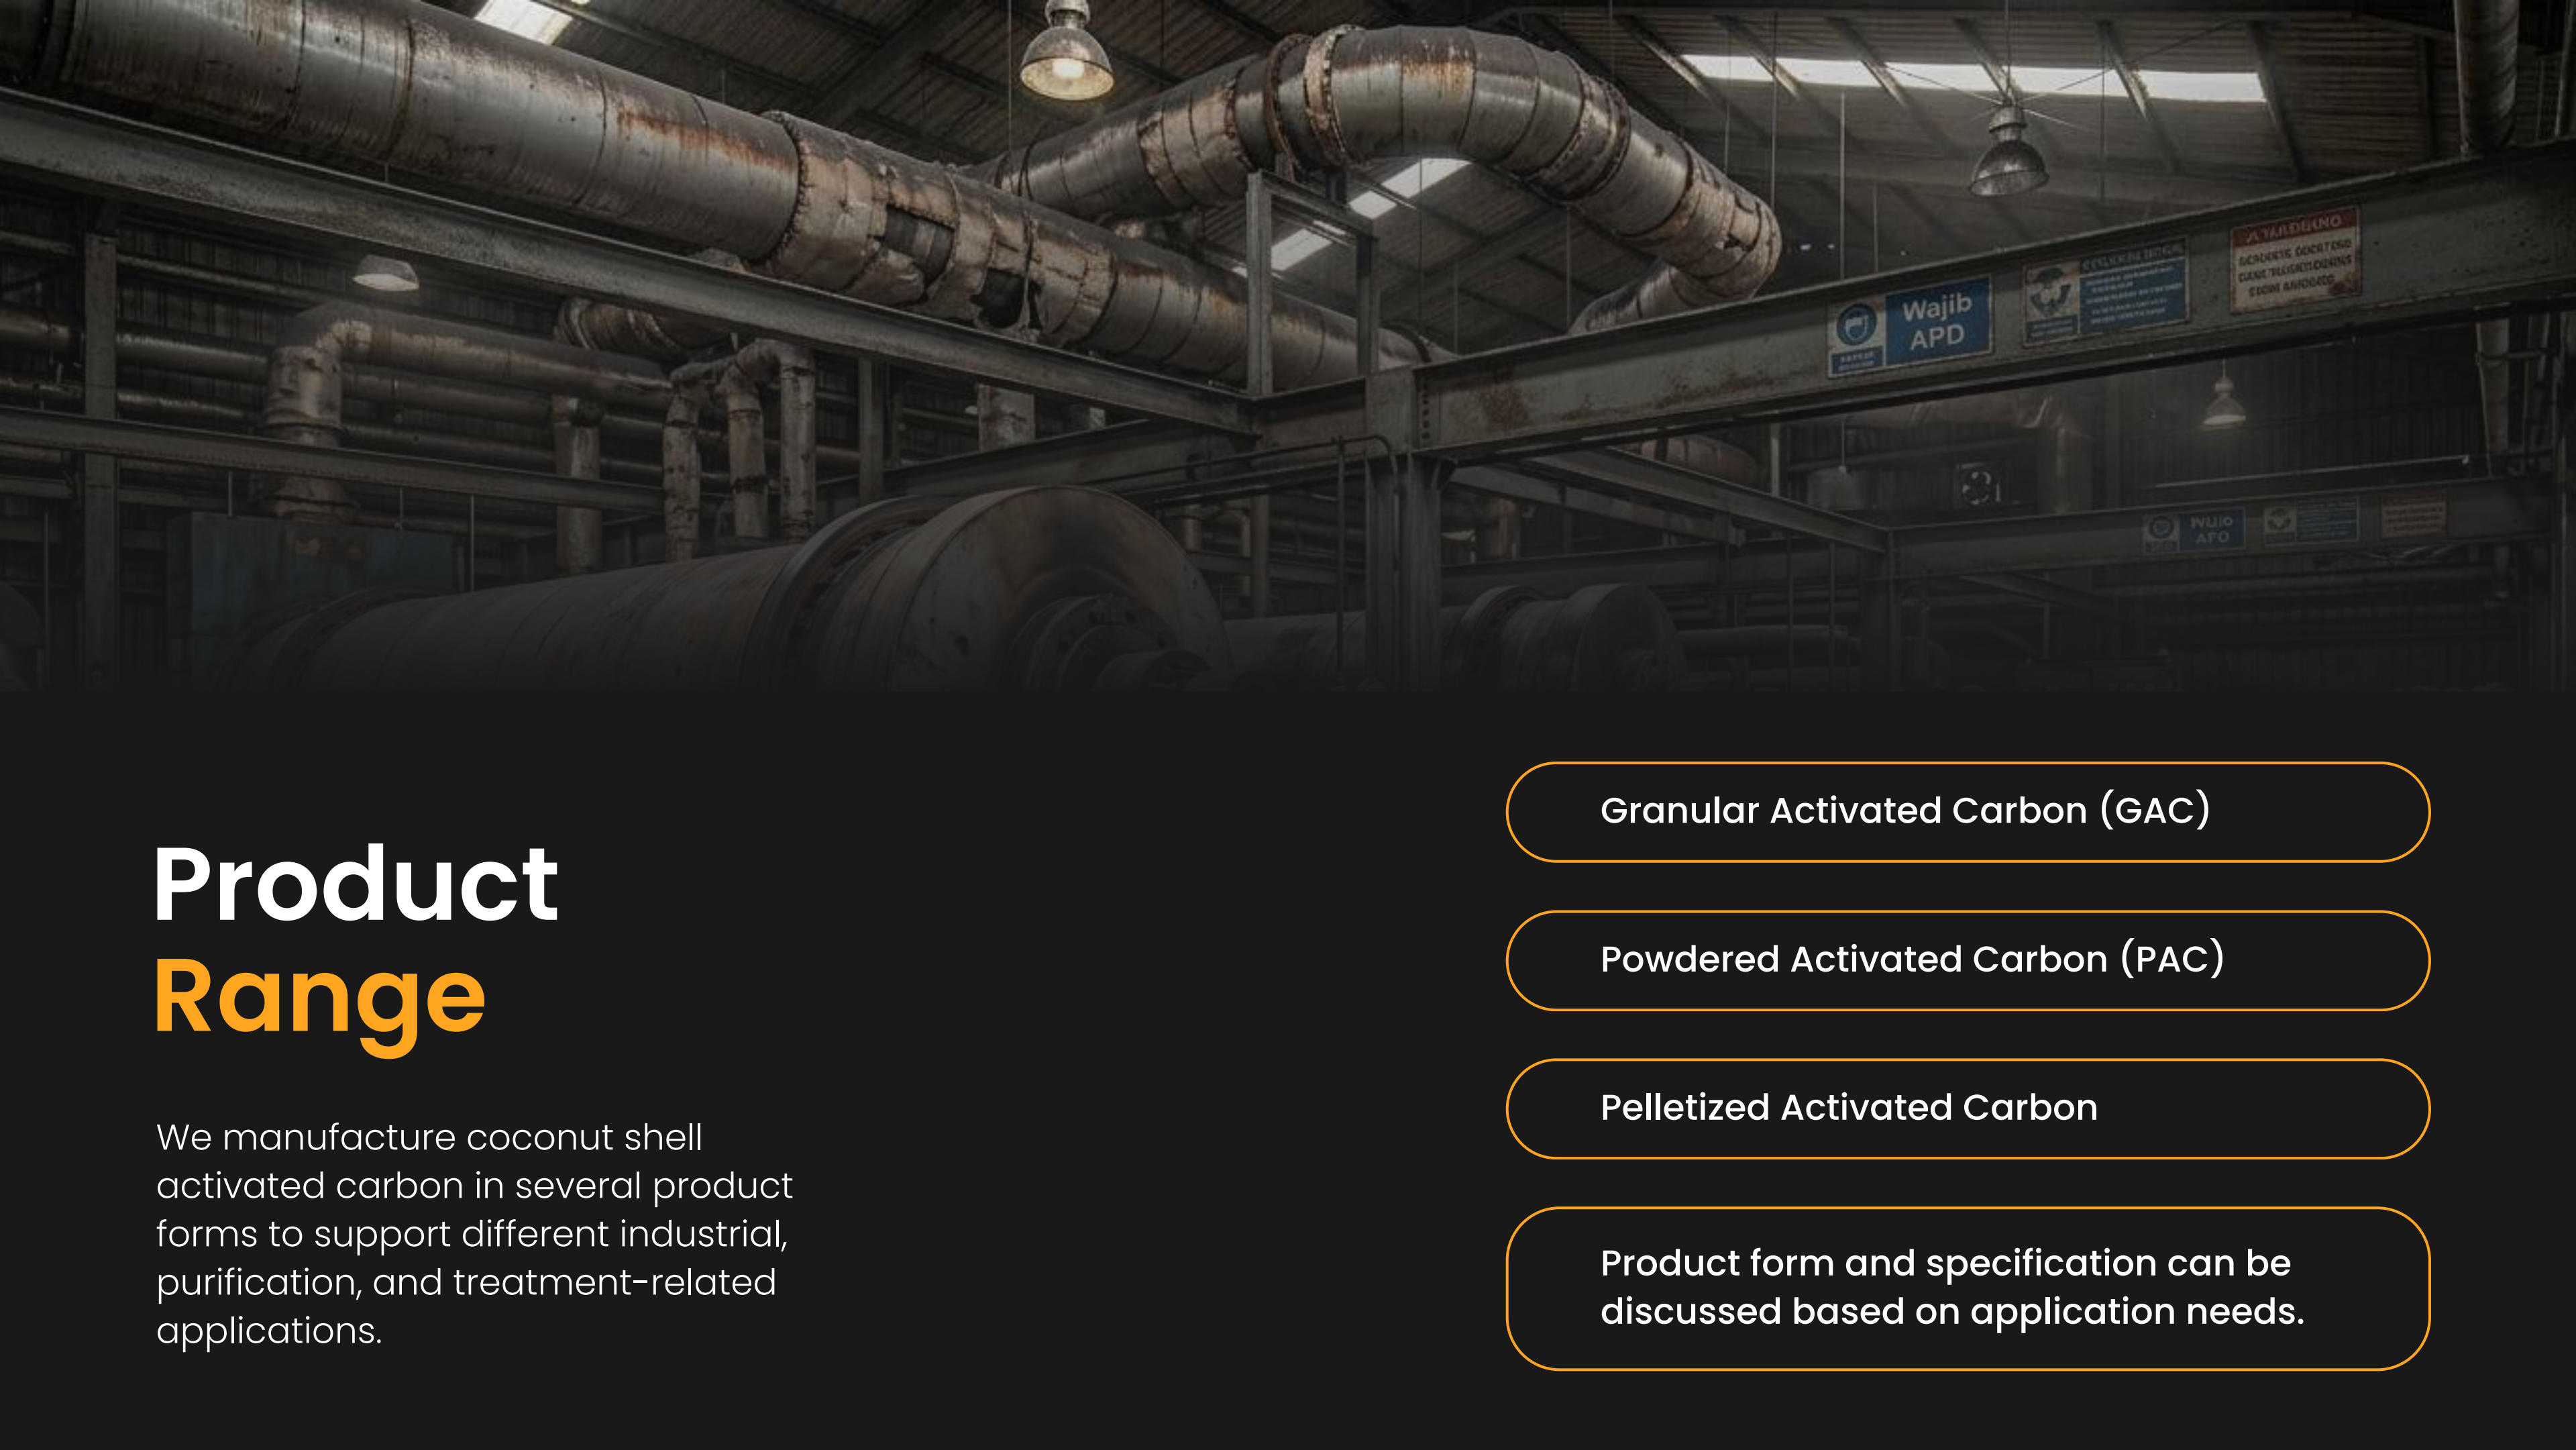

Product specification and technical information available upon inquiry.

Applications

For purification, filtration, odor control, and industrial processes.

Business Handling

Professional response for importers, distributors, and industrial users.

Product Range

We manufacture coconut shell activated carbon in several product forms to support different industrial, purification, and treatment-related applications.

Granular Activated Carbon (GAC)

Powdered Activated Carbon (PAC)

Pelletized Activated Carbon

Product form and specification can be discussed based on application needs.

Main Applications

Our coconut shell activated carbon is used in systems and processes where purification, adsorption, filtration, or odor control is required.

Water Treatment

Used in treatment systems requiring purification and filtration support.

Air Purification

Applied in selected air and gas-related processes where adsorption is needed.

Mining Application

Used in selected gold recovery processes where activated carbon adsorption is required.

Industrial Applications

Considered for various industrial processes based on operational needs.

Why Work **With Us**

We support every inquiry with a professional, practical, and business-oriented approach.

Manufacturing Focus

Coconut Shell Activated Carbon

We focus on coconut shell activated carbon as our core product direction.

Professional Communication

Clear & Responsive

We value timely, respectful, and business-oriented communication.

Reliable Handling

Structured Support

We support inquiries and cooperation in a dependable and practical manner.

Long-Term Cooperation

Business Partnership

We believe strong partnerships are built through trust, consistency, and mutual respect.

A large pile of coconut shells, which are the raw material for activated carbon, is shown in an industrial setting. The shells are dark brown and piled high, filling the foreground and middle ground. In the background, there is a building with a metal frame and a concrete wall, and some greenery is visible through the open structure.

Raw Material & Quality Focus

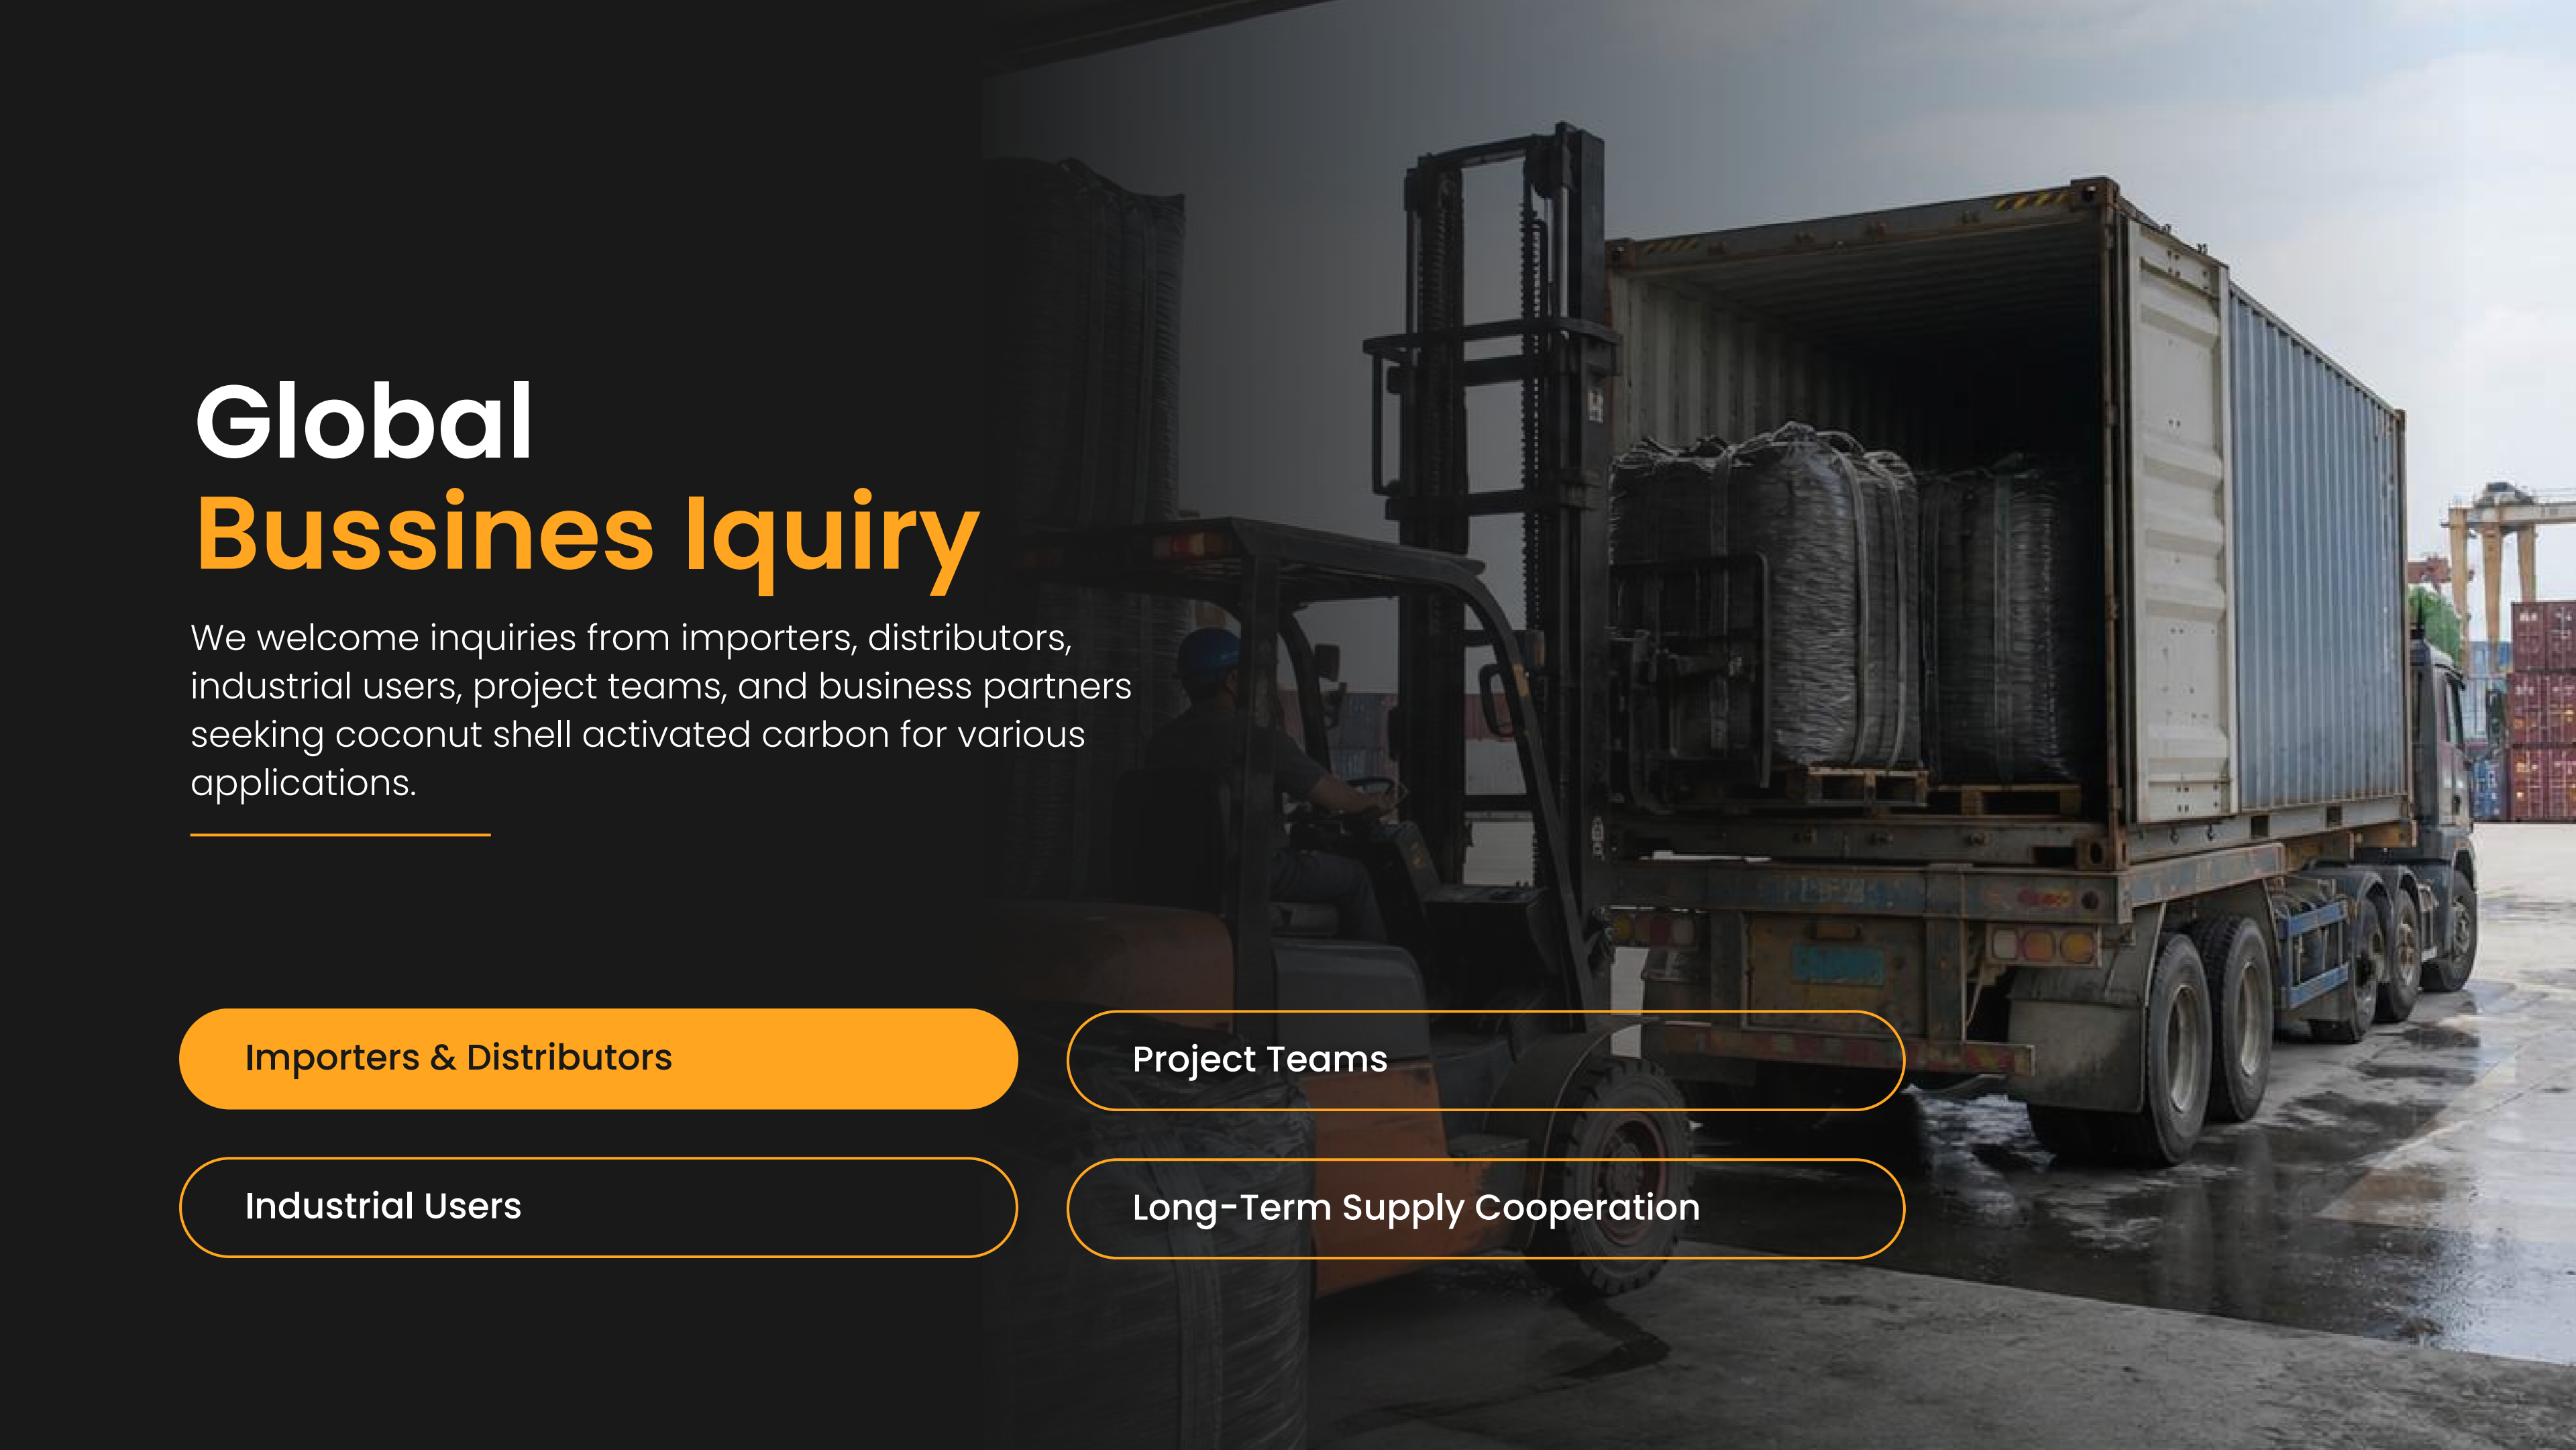

Our activated carbon is produced from selected coconut shell raw material, supported by a focused manufacturing process and practical quality control.

- **Coconut shell as primary raw material.**

Selected material for activated carbon production.

Manufacturing process focused on consistency.

Product information and documentation support available upon inquiry.

Global Business Inquiry

We welcome inquiries from importers, distributors, industrial users, project teams, and business partners seeking coconut shell activated carbon for various applications.

Importers & Distributors

Project Teams

Industrial Users
